## tech DEMO-DAY 2019

**Welcomes start-ups active in sustainability, circular economy and chemistry for an afternoon of meet and greet and match-making with facilities, scientific expertise and assistance with funding opportunities at Amsterdam Science Park**

Are you a start-up looking for high-tech facilities and expertise to accelerate the development of your product or service? Ever wondered how you can access Amsterdam Science Park's state-of-the-art facilities on a flexible basis? Or how to collaborate with researchers and students to initiate and realise your proof of concept? Or how to attract funding from the region?

### PROGRAM FORMAT

**DEMO I:** Interactive session about analytical and product/service development support at Amsterdam Science Park, recruiting students for feasibility and proof of concept studies & funding.

**DEMO II:** Opportunity for start-ups to pitch technological challenges to an expert audience and make instant matches with facilities/ expertise at Amsterdam Science Park

**MATCH-MAKING:** Opportunity to network with scientists and stake-holders at Amsterdam Science Park and other participating start-ups. Active follow-up on matches made with Spark904, AmsterdamGreenCampus & PIM

### FOR WHOM

For technology and innovation intensive start-ups and SMEs

For researchers and technicians at Amsterdam Science Park curious about how they can contribute to sustainability based start-ups in the Amsterdam metropolitan area

For business developers, tech transfer offices and incubators for tech start-ups

### DATE

21-06-2019

13:00- 17:00

### LOCATION

Spring Co-creation Center.  
Matrix VII, Science Park 106  
1098 XG Amsterdam

### COSTS

Free, Registration  
compulsory

### REGISTER

**Spark904** is a spin-off company of the University of Amsterdam and your gateway to the infrastructure and expertise at Amsterdam Science Park. With multiple research and knowledge institutions, we have a rather large fleet of instruments and devices, not to forget the extensive pool of experts, all in one campus. At Spark904 we help you accelerate your research and development activities by providing analytical and spectroscopic services and research advice.

---

**Amsterdam Green Campus** is a non-profit foundation of the University of Amsterdam. The foundation works to boost the economic growth in the green sector in the northwest of the Netherlands. Green in this respect stands for research and education for sustainable development, green growth and transition to circular economy in Green Genetics, Green Environment, Green Chemistry and Green Food with more to expect (Green Water, Green Energy). Companies from the region that have an innovation demand or government institutions that have a research question can go to this platform and initiate a joint project.

---

**PIM** is an investment readiness program initiated by the Province of Noord-Holland. It is executed by KplusV, Haarlem Valley and ACE Incubator. Through tailored support by experts, entrepreneurs are able to strengthen their businesses and create well-thought investment propositions. PIM also facilitates matching with the funding opportunities that fit the needs of the entrepreneurs and stages their companies are in. Because of the Province of Noord-Holland, it is able to do so at a very favorable rate.
