

Amsterdam Science Park

A world-class innovation hub to help
your business excel

Where bright minds solve tomorrow's challenges

Amsterdam Science Park is one of Europe's largest science hubs: a melting pot of innovation. Companies looking to collaborate can work together with brilliant students, scientists and fellow entrepreneurs. Collectively, they develop revolutionary solutions for today's issues and tomorrow's challenges.

Amsterdam Science Park's expertise

The park combines research, education and entrepreneurship, creating a powerful ecosystem. The interaction between the three creates ideal conditions for pioneering work across many sectors. Amsterdam Science Park focusses on the following fields:

- AI & data science
- Sustainability
- Life sciences
- High-tech systems and materials

Each focus area has its own dedicated ecosystem of research, business, talent and infrastructure. And, through collaboration, we help facilitate promising crossovers in a wide range of disciplines. Direct access to the talent and experts in these fields can help optimise R&D programmes and foster long-term collaborations to transform businesses.

When young talent, expert scientists and visionary businesses work together to drive technology forward, the potential is limitless.

Christine Fraser Boer, Sensoterra:

**“ Amsterdam Science Park
is a learning environment in
which anything is possible. ”**

Collaborate

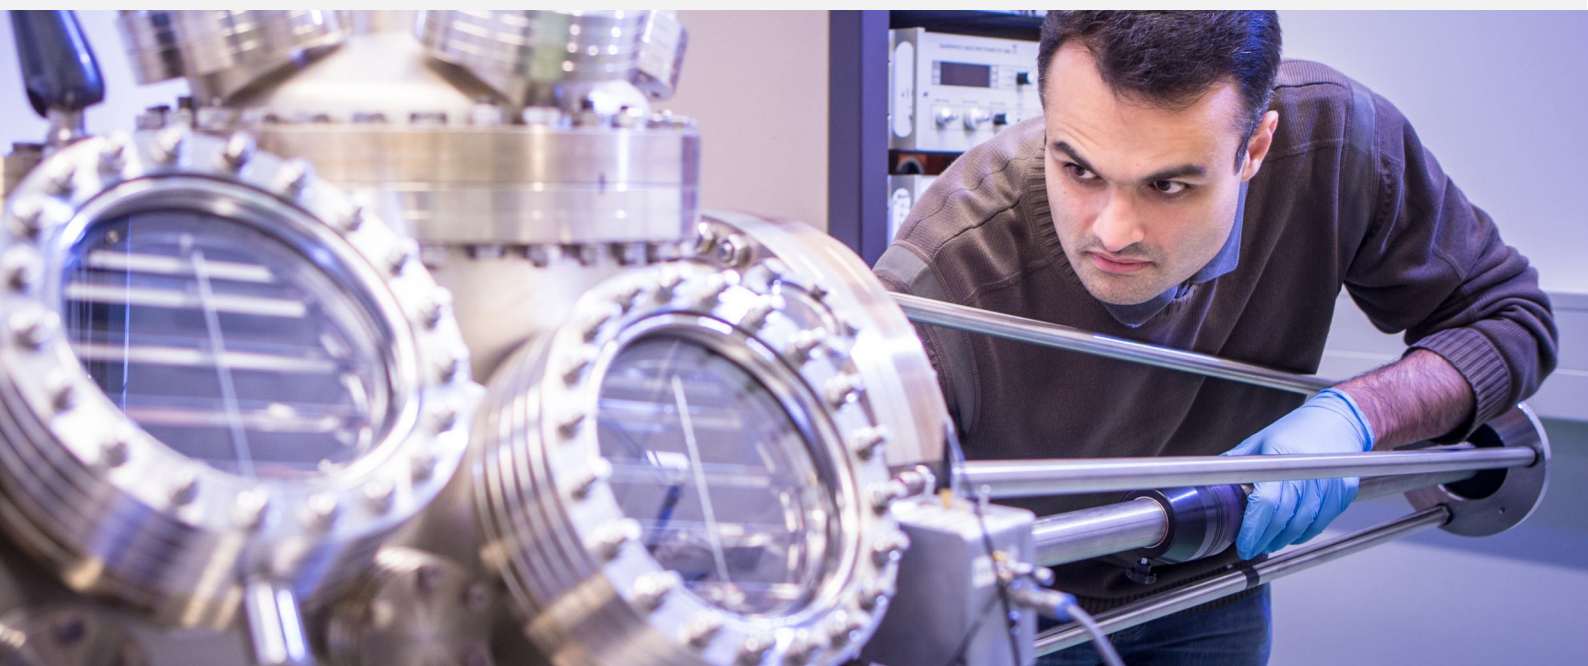

Searching for new ideas and inspiration?

Become part of this world-leading scientific hub. Your company could team up with high-potential students or innovative startups for problem-solving R&D. Here cross-disciplinary initiatives flourish, and ground-breaking research projects are transformed into successful spin-offs. It's no wonder that our network currently provides international research support to companies such as ASML, Qualcomm, Michelin, Philips, AkzoNobel and Lipton.

While the park offers an ideal location for businesses, we also provide various services and organise events. You don't have to be based at the park in order to collaborate and to tap into the talent.

Become part of a world-class scientific community.

A perfect business location

Marco van der Werf, BIT:

“ Startup Village is a very cool location. You instantly feel the vibe and the creativity in the air. “

Where ideas become innovative solutions

Becoming a part of the Amsterdam Science Park community is the biggest benefit of establishing your business here. In a space that encourages collaboration and a location that inspires big ideas, there is no limit to what can be achieved.

We offer a range of spaces to help your company flourish, from newbuilds to high-tech labs and from offices in multi-tenant buildings to spaces in the Startup Village.

Multi-tenant buildings

Matrix Innovation Center provides state-of-the-art accommodation and additional services to more than 100 companies and organisations dedicated to sciences and activities in related fields.

Startup Village

Startup Village is the most inspiring hub for tech-based startups who want to take advantage of Amsterdam Science Park's innovative network.

Real Estate

Amsterdam Science Park offers companies the unique opportunity to develop their own business buildings on available plots. This space is intended for companies that can contribute to the synergy in the park.

Amsterdam Science Park: a world-class facility

Enjoy the extras

The community here has access to other excellent facilities, too. The site has spacious rooms for events, meetings and conferences. A lively assortment of restaurants and sports facilities completes an ideal working environment.

Amsterdam Science Park gives your company access to:

- Top-level scientists and students
- World-class technical infrastructure
- Incubators
- High-end office and lab space
- Meeting venues, restaurants and sport facilities
- High-tech research facilities
- Lightning-fast internet; direct proximity to the Amsterdam Internet Exchange - reach 80% of Europe in 50 milliseconds
- Business Club membership to connect with other companies, collaborate and share knowledge
- Access to key networks like Amsterdam AI, ICAI, Amsterdam Chemistry Network, Amsterdam Green Campus and SustainaLab

Reasons you'll love our location

- Turnkey office space in multi-tenant buildings with world-class technical infrastructure
- Quick connections to Amsterdam's city centre and Amsterdam Airport Schiphol
- Bike rental and car-sharing services
- Situated next to Amsterdam's top universities
- Own train station

Max Welling, University of Amsterdam:

“ The great thing about this ecosystem is that there is a lot of energy and excitement to build this together. ”

Peter Rauber, Qualcomm:

“ Amsterdam is developing into an AI hotbed. ”
